Abstract: Stakeholder analysis is a tool used to identify and understand the interests and influence of various groups or individuals who may affect or be affected by an organization's actions. It is a critical component of strategic management and helps organizations to anticipate and respond to the needs and expectations of their stakeholders. The process typically involves identifying stakeholders, assessing their interests and influence, and developing strategies to manage their relationships. Stakeholder analysis can be used in a variety of contexts, including corporate strategy, public policy, and social impact. It is a dynamic process that evolves as the organization's environment and stakeholders change over time.
